

FIG. 1 is an exploded perspective view of a portable electronic device assembly. The assembly includes a top cover (36) with a central opening (78) and a bottom cover (12) with a central opening (22). A central component (34) is positioned between the covers, featuring a central post (82) and various internal components (80, 30, 26, 24, 40, 86, 44, 46, 45, 49, 16, 14, 20). A screwdriver (10) is shown with a dashed line indicating its use to secure the assembly. The device is shown in an exploded state, with the top cover (36) and bottom cover (12) separated from the central component (34).
